

E-ColorPak MassTones

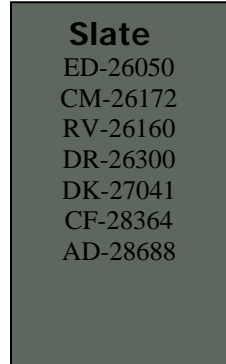

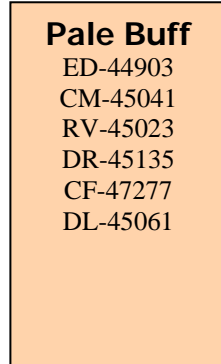

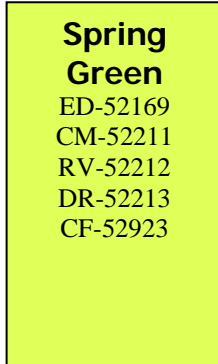

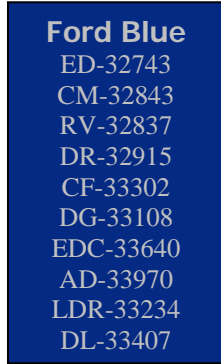

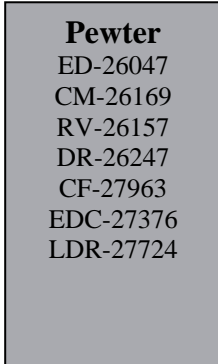

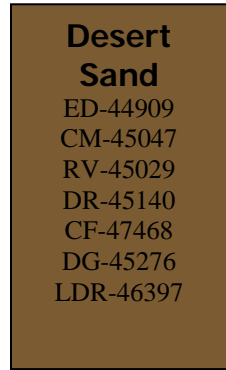

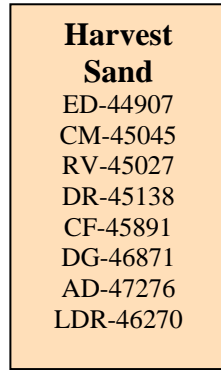

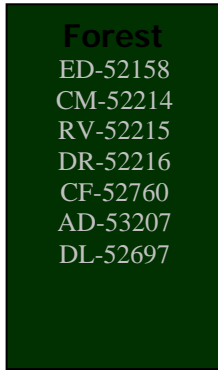

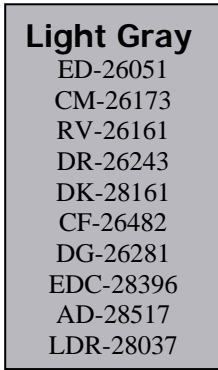

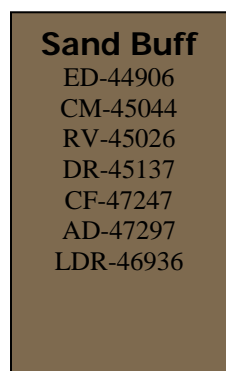

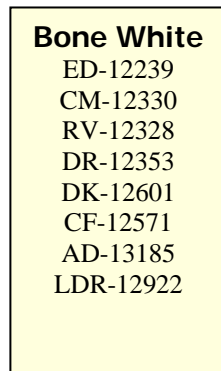

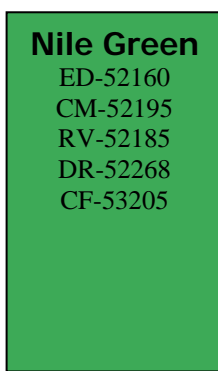

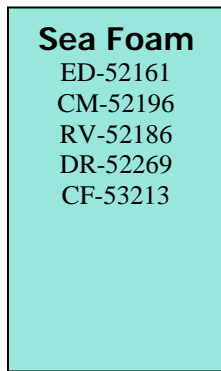

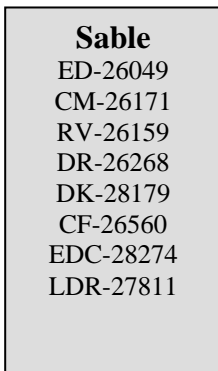

The following masstones from Plasticolors are single pigment dispersions which have been produced using a high-performance unfilled system. Tints are produced using 1 part colorant to 4 parts TiO₂. White and Black are not shown.

Inherent system color will affect final appearance. The following examples demonstrate the difference in Safety Yellow when two different fillers are added, a clay filler and a carbonate filler. Compare these to the unfilled Safety Yellow

Always evaluate the Colorant in your system prior to scale up.
If an exact color match is required, call Plasticolors for custom color matching service.

ColorPak is a combination of 35 blends and 12 MassTones (white and black not shown) developed in various resin specific carriers. When applicable, ColorPak gives you a ready alternative to Plasticolors' custom color matching service and to customer in-house colorant production. Plasticolors' outstanding customer service and manufacturing excellence reinforce ColorPak by providing the flexibility in quantity, packaging and short delivery times you require.

ColorPak Advantages

- **Heavy Metal Free**
- **Improved consistency with high-quality organic milled dispersions**
- **Available in a variety of carrier vehicles specializing in resin-specific carriers for better system compatibility**
- **Eliminates handling problems associated with processing dry pigments:**
 - Removes dust contaminates**
 - Improves the working environment**
 - Outsourcing improves your capacity utilization**
