

# E-ColorPak MassTones

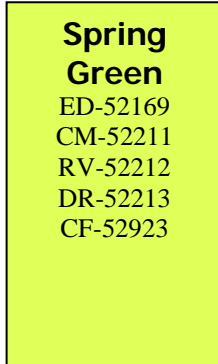

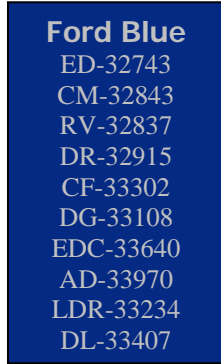

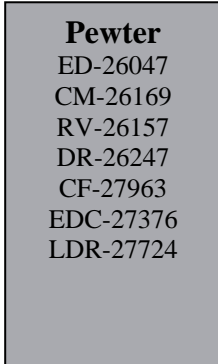

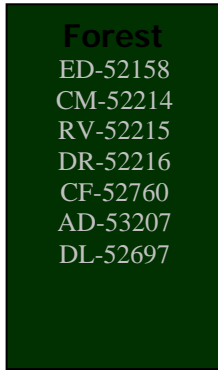

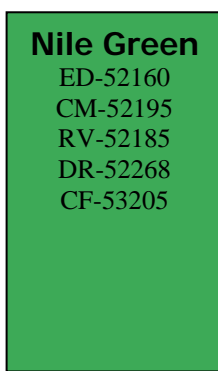

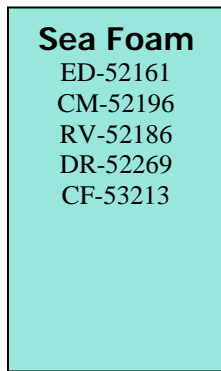

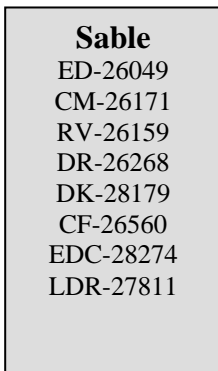

The following masstones from Plasticolors are single pigment dispersions which have been produced using a high-performance unfilled system. Tints are produced using 1 part colorant to 4 parts TiO<sub>2</sub>. White and Black are not shown.

**Inherent system color will affect final appearance.** The following examples demonstrate the difference in Safety Yellow when two different fillers are added, a clay filler and a carbonate filler. Compare these to the unfilled Safety Yellow

**Always evaluate the Colorant in your system prior to scale up.**  
If an exact color match is required, call Plasticolors for custom color matching service.

ColorPak is a combination of 35 blends and 12 MassTones (white and black not shown) developed in various resin specific carriers. When applicable, ColorPak gives you a ready alternative to Plasticolors' custom color matching service and to customer in-house colorant production. Plasticolors' outstanding customer service and manufacturing excellence reinforce ColorPak by providing the flexibility in quantity, packaging and short delivery times you require.

## **ColorPak Advantages**

- **Heavy Metal Free**
- **Improved consistency with high-quality organic milled dispersions**
- **Available in a variety of carrier vehicles specializing in resin-specific carriers for better system compatibility**
- **Eliminates handling problems associated with processing dry pigments:**
  - Removes dust contaminates**
  - Improves the working environment**
  - Outsourcing improves your capacity utilization**
